MEMORANDUM FOR: Director, National Foreign Assessment Center

FROM: Director of Central Intelligence

SUBJECT: Siberian Pipeline

I need a two page memorandum, plus a page or two of graphics, which will lay out:

1. Dollar value of pipe required for Siberian pipeline over the next five years.

2. Dollar value of pipe required for development of Soviet internal gas supplies over the next five years.

3. Proportion of Cocom exports which each represents. This could be added to the above list in a separate column.

4. The same for the remainder of Siberian gas deals and internal gas development.

5. Percentage of Cocom energy needs which gas obtained from the Siberian pipeline will represent.

6. Dollar amount of increase of U.S. coal exports needed to replace gas from Siberian pipeline.

7. Increase in Cocom nuclear energy production needed to replace gas from Siberian pipeline.

8. Capacity of synthetic gas production which could be well over \$16 billion when available and how this would compare with gas from Siberian pipeline.

9. Degree to which hard currency earned by Siberian pipeline would increase monies which the Soviet Union could otherwise spend in Europe.

10. Material and manpower which the Soviet Union would have to put into building pipe, compressors and other energy items if they were not available in the West.

11. What portion of Soviet military production would this represent assuming it is all diverted from military production.

25X1

SECRET

SECRET

- 2 -

12. Percentage of U.S. defense expenditures and total Cocom defense expenditures.

13. Ratio of U.S. military budget to Germany, to Japan, to France.

This is a start. Refine the comparisons if you think necessary.

25X1

for William J. Casey
